

# 6<sup>TH</sup> INTERNATIONAL CLIMATE CHANGE ADAPTATION CONFERENCE

## ADAPTATION FUTURES CONFERENCE

### Guidelines for Updating Accepted Abstracts and Session Proposals

Given that significant time has elapsed since the submission of abstracts and session proposals that were accepted, the organisers of the 6<sup>th</sup> edition of Adaptation Futures recognise that some of the submissions may require updating. In this context, the organisers would like to give submitters an opportunity to make minor changes and update or refresh their accepted submissions.

The general guidelines for the process are given below:

1. The updated abstract or session proposal must be within the same theme and sub-theme as the original accepted submission.
2. The updated abstract or session proposal should not involve significant changes from the original accepted submission, or take away from the substance of the original accepted submission.
3. Any update that deviates from the above will not be valid. In this case, the original accepted submission will be considered for the conference.

Dates for updating the submissions, **will be intimated by end of March 2021.**
